

# installation

## Santa Barbara Bank & Trust Corporate Headquarters Santa Barbara, California

The bank's corporate board room and large training/conference room were in need of audio-visual support, so we designed and installed an audiovisual system including a ceiling mounted projector capable of showing computer graphics and video playback on a recessed 6x8-foot electric screen. The system also includes an integrated audio system with wireless microphones, a whiteboard and a tabletop teleconferencing unit. And we made provisions to prepare the system for the installation of video conferencing equipment in the future.

"We have been impressed by the sophistication of the audiovisual systems, yet pleased by their ease of use and reliability. Jensen Audio Visual is extremely professional and flexible. They take great pride in their work and sincerely care about the satisfaction of their client."
