Santa Barbara City College La Playa Stadium Santa Barbara, California

La Playa Stadium holds nearly 10,000 fans for City College football games, soccer games and track meets. The sound system had not been upgraded since the late 1960's and was in dire need. The City College athletic director had a goal of being able to hear the game announcements all the way out at the islands! Although the final system was not quite that extreme, Jensen Audio Visual installed a new sound system that all fans can hear loud and clear.

"Jensen AV has been responsible for our Audio Visual for over the last 8 years. It has always been perfect and the technician's are true professionals in every sense of the word. I have never been disappointed in the outcome. I would recommend Jensen AV to anyone wanting one less thing to worry about, be it large or small."
-Tom Zeiher, Information Technology, SBCC

Business 1st National Bank Santa Barbara, California

At the corporate headquarters of Business 1st National Bank, customers can hear background music playing throughout the branch from an integrated Bose audio system. In the customer reception area, dual 30" LCD televisions play CNN News and the a Stock Report channel.

This system was designed to be flexible in use. During shareholder or staff meetings a microphone can be incorporated into the audio system for presenters and the LCD displays can show computer PowerPoint presentations.
